DARSH N. PATEL

Full Stack Web Developer & AI Enthusiast

Highly motivated Full Stack Web Developer Intern with expertise in developing scalable web applications and AI-powered platforms using the MERN stack. Skilled in clean UI/UX design and efficient backend architecture. Proficient in JavaScript, Python, HTML/CSS, database design and management, responsive design, and SDLC deployment.

Beyond the terminal, I'm a photographer and cinematographer.

SKILLS

- Proficient in MERN Stack technologies like React, Node, and Express
- Skilled in JavaScript and Python for web development
- Strong in HTML/CSS for front-end design
- Experienced in designing and managing databases
- Knowledgeable in Responsive Design principles
- Adept at following SDLC best practices for software deployment

EXPERIENCE

Full Stack Web Developer Intern

Grownited Private Limited, Ahmedabad

Jan 2026 – Apr 2026

- Designed and implemented a MERN stack web application, focusing on scalability and performance.
- Collaborated with cross-functional teams to seamlessly integrate frontend, backend, and database modules.
- Ensured high-quality software delivery and optimized performance by rigorously following SDLC best practices.

KEY PROJECTS

Crackit.AI – AI Skill Platform

[Live Demo](#)

- Developed an AI-powered platform for student skill tracking and performance analysis
- Built personalized dashboards with real-time progress visualization
- Implemented secure user authentication and responsive user interface

BidVault – E-Auction Platform

[Live Demo](#)

- Created a full-stack e-auction platform with real-time bidding functionality
- Developed role-based dashboards for buyers, sellers, and admins
- Integrated secure escrow-based payment workflow and responsive UI

Dreamland Travel

[Live Demo](#)

- Designed and developed a responsive travel booking and information website
- Created an attractive UI/UX to showcase travel destinations and packages
- Optimized navigation and mobile responsiveness for better user experience

NoNap Drive – Drowsiness Detection

- Built a computer vision-based driver safety system using OpenCV and Python
- Implemented real-time eye and yawning detection to identify driver fatigue
- Added audio alerts and emergency SMS with live location for safety assistance
